

FTSE Group and Bolsas y Mercados Españoles (BME) have joined forces to create three indices, the FTSE LATIBEX All-Share Index, FTSE LATIBEX TOP Index and the FTSE LATIBEX Brazil Index. These provide investors with real-time access, in one single point, to the performance of Latin American stocks listed on LATIBEX and denominated in Euros.

The benchmark FTSE LATIBEX All-Share Index has been designed to represent the performance of the LATIBEX market in real-time. The index comprises all securities that are listed on the market, covering eight countries: Argentina, Brazil, Mexico and Peru.

The FTSE LATIBEX TOP Index is a tradable index for derivatives, designed to represent the performance of the largest and most liquid securities trading on LATIBEX. The index comprises the fifteen largest listed securities, which have specialist liquidity providers. The free-float weight is capped at 10% to ensure that it meets fund regulatory requirements worldwide to avoid overconcentration in any one stock.

The FTSE LATIBEX BRAZIL Index is a Euro-denominated tradable index covering Brazilian stocks, and ranks the most liquid listed on LATIBEX by free float adjusted market cap.
